CATERPILLAR TO BUTTERFLY: ADVENTURES IN SCIENCE, MUSIC, AND DANCE

This groundbreaking educational DVD invites children to leave their desks behind and move creatively to perform their understanding of science. Brain research shows that students quickly grasp more complex and rigorous academic content when multiple learning modalities, particularly movement, are integrated into the learning process.

Nationwide, all students between the ages of 4 to 8 study the lifecycle of the butterfly as a fundamental introduction to biology and life sciences. *Caterpillar to Butterfly* presents a revolutionary way to teach this science standard. This 80-minute DVD includes a detailed, weeklong arts-integrated learning process.

Students learn on five different levels: through viewing stunning, time-lapsed nature footage; through moving their bodies as they listen to music; through drawing pictures that reveal their comprehension of science; through retelling their understanding in their own words; and through performing the butterfly life cycle.

Teachers and parents can simply put this DVD in the player,

facilitate reflection and learning conversations at the end of each chapter, and enjoy watching the children learn. Parents and educators can witness the power of the arts in action, in their own classrooms and living rooms!

- Silver Omni Award Winner, Educational Category & Children's Category
- Creative Child Magazine - 2011 DVD of the Year Award
- The National Parenting Center Seal of Approval 2011
- NSTA Recommends from the National Science Teacher's Association

*"This fascinating, **unique approach to teaching** will be a **welcome addition** to grade school or home school collections."*

- School Library Journal

*"Caterpillar to Butterfly really impressed testers as being **an innovative and creative way to teach children about science, dance and movement**. Parents were so impressed at how their children really absorbed the information provided."*

- The National Parenting Center

*"The original, creative way Caterpillar to Butterfly demonstrates a lesson in wildlife biology is **sure to captivate young children and stimulate the learning process**. ... Teachers, children, and parents alike will be impressed."*

- National Geographic Kids

*"The **well-organized program** includes captions, which highlight important concepts. Following the presentation, the children draw their own interpretations of the butterfly life cycle. Incorporating sensory modality into the learning process, this program **combines art and science in a nice package**."*
